# Problem definition + concept

- Long time before getting medicine
- Getting the wrong medicine
- Awkward encounter with pharmacist

## Create better experience at pharmacy

- Solution: Automated system

# The Current Situation

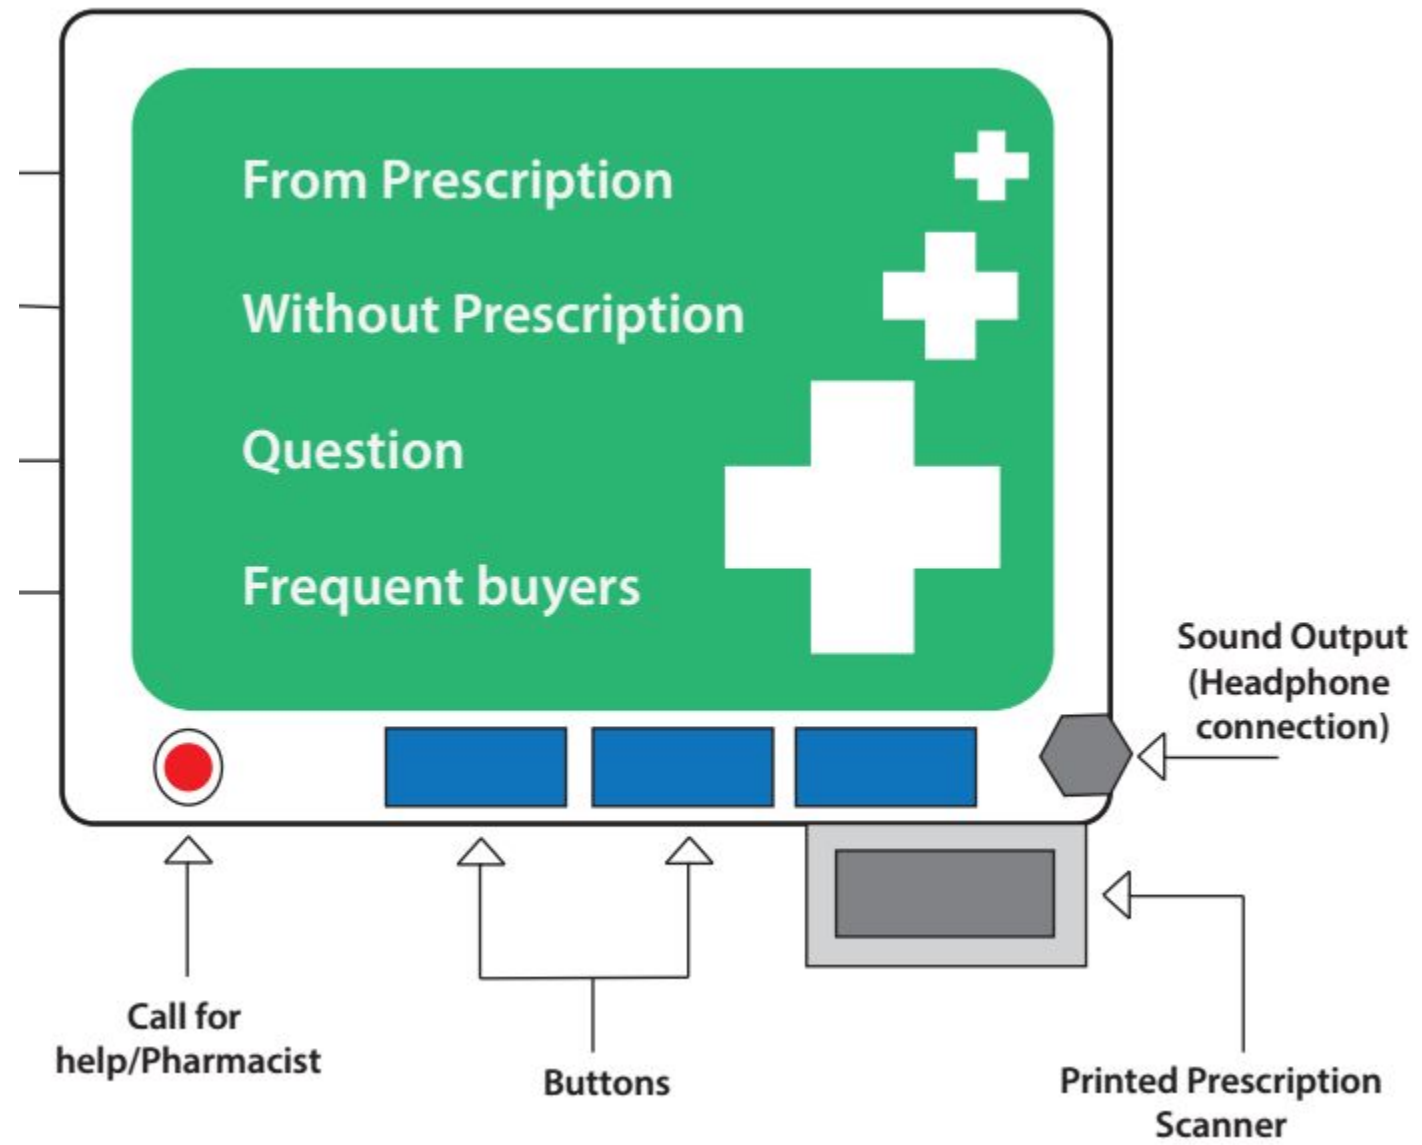

**‘Make the care of patients your first concern’**

# Working out the concept

- **Automated storage system**
  - **Already developed**
- **Medicine dispenser**
  - **User friendly UI on touchscreen**
  - **Speakers for audio support**
  - **Scanner for prescription**
  - **Box for delivery of medicine**
  - **Follows same steps as pharmacist**
- **Still a pharmacist present for additional support**

# User Interface concept

# Schedule
